MUNICIPAL PROFILE

1.1 Introduction

The 2026 Annual Action Plan is an extraction from the District Medium Term Development Plan (DMTDP-2026-2029). It outlines prioritized programmes and activities that are intended to be implemented in 2026. These programmes and their objectives constitute the road map in the municipality's efforts to meet the District Medium Term Development Goal. The priority interventions for 2026 seek to address five main issues hindering the growth of the municipality. These include weak human resource base, low agricultural productivity, weak institutional capacity for service delivery, weak revenue mobilization and management capacity and poor infrastructure development. This plan is therefore the strategy to deal holistically with these problems and to provide a sustainable foundation for the accelerated development of the Municipality within the context of the National Development Strategy.

1.1.1 Administration

The Suhum Municipality is one of the 33 administrative districts in the Eastern Region of Ghana. It used to be part of the defunct Suhum-Kraboa-Coaltar District until the Ayensuano District was carved out of it in July 2012 and Suhum elevated to a municipality status.

1.1.2 LI Establishing the Municipality

It was established in July 2012 by Legislative Instrument (L.I.) 2048 and Suhum is the municipal capital.

1.1.3 Population

The municipality has a population of 126,403 made up of 61,226 (48.7%) males and 65,177 (51.3%) females. This represents about three percent (3.4%) of the total population of the Eastern Region. Also, 37.8 percent of the population are within the age group 0-14years (children), while 32.3 percent are youth (15-34 years) with 5.9 percent being aged (65+ years). According to MPCU projection based on 2010 population census.

1.1.4 Municipal Economy

The economy of the municipality comprises agriculture, service, commerce and light industrial sectors. However, the details of these sectors are elaborated in the sections below.

1.1.4.1 Agricultural Activities

More than half (57.8%) of households in the Municipality are engaged in agriculture. In terms of rural-urban distribution, the number of households engaged in agriculture in the rural areas (74.7%) is almost three times the number in the urban areas (25.3%). Most of the agricultural activities in the Municipality therefore take place in the rural areas.

Crop farming in the Municipality is very dominant in the rural areas. The number of households engaged in crop farming in the rural areas (77.4%) is about three times more than the number in urban areas (22.6%). Tree planting and livestock rearing is practiced by over 80 percent (80.6 and 81.2 percent respectively) of rural agricultural households which is four times higher than the number of agricultural households in the urban areas who are engaged in tree planting (19.4%) and livestock rearing (18.8%).

1.1.4.2 Literacy and Education

In the Suhum Municipality, 85.1 percent of the population aged 11 years and older are literate. In all 19.5 percent of the population in the Municipality can read and write English only while 88.0 percent can read and write English and another language. The proportion of literate males to females is 91.6 percent and 79.5 percent respectively. However, the proportion of illiterate females (20.5%) is more than twice that of males (8.8%).

Six out of every ten (61.8%) persons who have attended school in the past have JSS/JHS or middle school as the highest level attained. The proportion of male tertiary graduates (5.0%) is more than twice the proportion of corresponding females (2.1%).

1.1.4.3 Other Economic Characteristics- Sector and Activity

Generally, seven in ten (74.8%) persons aged 15 years and older in the Municipality are economically active. Among the economically active population, nine in ten persons (95.0%) are employed while 5.0 percent are not employed. There is not much gap between the proportion of males and females as 75.9 percent and 73.9 percent respectively are economically active.

Economic activity is lowest among the age group 15-19 years with 23 percent being economically active while 77 percent are not economically active. Among the economically active within that age group, 87.6% are employed with the rest (12.4%) not employed. Economic activity starts rising from the age

group 20-24 years (70.3%) and peaks at 95.8 percent at 45-49 years and begins to fall consistently from the ages 50-54 (93.8%).

Agriculture, including forestry and fishing (37.7%) constitute the major industry of the employed population in the Suhum Municipality. Other major industries are wholesale and retail; repair of motor vehicles and motorcycles (21.9%), manufacturing (11.5%) and accommodation and food service activities (5.9%).

1.2. Vision and Mission

1.2.1 Vision Statement

An environmentally friendly and economically viable Municipality with adequate and accessible amenities for the people to actualise their dreams and enjoy peaceful co-existence.

1.2.2 Mission Statement

The Suhum Municipal assembly exists to constantly upgrade the quality of life of the people in the Municipality through the efficient mobilization and utilization of resources within an effective participatory local governance framework.

1.3. District Development Goal

The basic goal of the District Medium Term Plan (2026-2029) is to address the high levels of poverty in the district by creating the enabling environment for increased production and productivity and improvement in the delivery of basic services.

1.4 Annual Action Plan (2026)

For the Suhum municipal Assembly to achieve its objectives and realize its broad goal, with the aim to promoting the general well-being of the people, there are a number of programmes and projects to be undertake from January to December 2026. The table 1 below shows the various activities.

Table 1: Annual Action Plan, 2026
